This publication supersedes AMS-523, "Reports and Publications of USDA's Consumer and Marketing Service," issued January 1964.

PREFACE

This report lists the publications of the Consumer and Marketing Service, numerically by series under the four broad C&MS program categories—Consumer Food, Consumer Protection, Marketing Services, and Market Regulation. Included also: a general section listing publications dealing with matters broader than any one of the four categories; a separate listing by series and number; a section listing the major periodicals of the Consumer and Marketing Service, with the exception of market news reports, which are listed in C&MS-21, 'Federal-State Market News Reports—A directory of services available.'"

Copies of publications are free, as long as the supply lasts, unless a price is given. Copies of publications in the AMS-, C&MS- or PMG-series are available from the Information Division, Consumer and Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250. Copies of other publications listed as free are available from the Office of Information, U.S. Department of Agriculture, Washington, D.C. 20250.

Publications with a price (marked*) may be ordered directly from the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402. Remittances can be made by coupons which are sold by the Superintendent of Documents in the denomination of 5 cents, postal money order, express order, or personal check. Currency may be sent at the sender's risk.

The series in which the publication is issued indicates the nature of the material in the publication (popular, technical, semitechnical, etc.) and the audiences for which intended. The only publications listed in each of the following series are those issued by the Consumer and Marketing Service, or by predecessor agencies for lines of work now continued by the Consumer and Marketing Service. Below is an abbreviated description of each series as applied to agricultural marketing:

AB—Agriculture Information Bulletins: Semitechnical marketing information of interest to people and groups throughout the American public—urban as well as rural.

AH—Agriculture Handbooks: Information for ready reference, such as manuals, guidebooks, specifications, glossaries, and lists of plants or animals, for professional and technical workers.

AMS—Series: Material not eligible for other series listed here. For example, preliminary reports on marketing research, such as reports on less complete research projects than are reported in the Marketing Research Report series; non-administrative agency guides and handbooks that lack sufficient general interest to be included in the Agriculture Handbook series; reference lists; reprints of major articles from C&MS periodicals presenting new information on C&MS programs; annual statistical compilations not eligible for the Statistical Bulletin series. Series discontinued.

C&MS—Series: Replaces AMS series.

FB—Farmers' Bulletins: Easily read and understood bulletins emphasizing the practical application of agricultural information, stressing directions and recommendations.

G—Home and Garden Bulletins: Easily read and understood bulletins emphasizing the practical application of such subject matter, stressing directions and recommendations.

L—Leaflets: Popular material of the same general character as the Farmers' Bulletin and Home and Garden Bulletin series but in a briefer form.

MB—Marketing Bulletins: Popular presentation of information on agricultural marketing for the general public.

M—Miscellaneous Publications: Both technical and nontechnical publications that do not conform to the size or type of material specified for the other series.

MRR—Marketing Research Reports: Results of marketing research in semitechnical or semipopular style.

PA—Program Aids: Information on current agricultural marketing programs for people affected by the program.

PH-S—Photo Series: Four- to eight-page leaflets with photographs and explanatory legends on a particular phase of agricultural marketing. Prepared especially for magazines and newspapers needing illustrative material.

PMG—Poultry Marketing Guide: Information compiled annually to help producers and marketers tailor their production and marketing plans to market prospects.

PS—Picture Stories: Same as PH-S series.

SB—Statistical Bulletins: Annual or several-year compilations of market news and other statistics gathered relating to agricultural marketing programs.

T—Technical Bulletins: Results of research carried on by the Consumer and Marketing Service and its cooperators written in technical language and intended chiefly for scientists and specialists in the field studied.

Following each publication title, we have indicated the division of the Consumer and Marketing Service responsible for the program or activity covered in the publication. For a statement of the work of the Consumer and Marketing Service and programs assigned to the various divisions, see PA-661, "This is USDA's Consumer and Marketing Service." A list of the divisions and the symbol identifying each follows. If you order publications and do not find the answer to your question or problem, you may wish to address an inquiry to the division responsible for the program.

Administrative Services Division (AS)
Commodity Distribution (CD)
Consumer Protection Programs Services Staff (CPPS)
Cotton Division (CN)
Dairy Division (DA)
Food Stamp Division (FS)
Food Trades Staff (FT)
Fruit and Vegetable Division (FV)
Grain Division (GR)
Information Division (IN)
Livestock Division (LS)
Matching Fund Program (MF)
Poultry Division (PY)
Processed Food Inspection Division (PFI)
School Lunch Division (SL)
Slaughter Inspection Division (SI)
Technical Services Division (TS)
Tobacco Division (TB)
Transportation and Warehouse Division (TW)

PERIODIC REPORTS

(EXCEPT MARKET NEWS REPORTS)¹

AGRICULTURAL MARKETING, a monthly magazine, is designed to keep publications, organizations, marketing firms, marketing specialists, and other officials and individuals informed about current activities in marketing that relate to the work of the Consumer and Marketing Service. It discusses (1) marketing services, such as the establishment of standards and the grading and inspection of farm products, and market news; (2) consumer food programs, such as school lunch, food stamps, donated foods, and plentiful foods; (3) market regulation activities such as the administration of the Perishable Agricultural Commodities Act, U.S. Warehouse Act, and marketing agreements and orders for milk and for fruits and vegetables; and (4) consumer protection activities, such as the inspection of meat and poultry for wholesomeness.

Free distribution of AGRICULTURAL MARKETING is limited generally to persons engaged in information or education work closely related to one or more of the programs administered by USDA's Consumer and Marketing Service, or who are assisting in some manner in carrying out these or closely related programs. This includes, for example, libraries, information media, Federal and State employees cooperating with C&MS programs, consumer groups, and staff members of agricultural colleges. Free distribution is handled by the Information Division, Consumer and Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250. Subscriptions may be purchased at \$1.50 a year (foreign rate \$2.25). Single copies are 15 cents each. Make checks payable to the Superintendent of Documents and send order and remittance to the Government Printing Office, Washington, D.C. 20402.

ACREAGE-MARKETING GUIDES

Acreage-Marketing Guides, published seasonally, are designed to assist vegetable growers in balancing the supply of each vegetable with market requirements. They provide the best possible estimates of the acreage of individual vegetables needed in meeting these requirements. Six guides booklets are published each year, in advance of planting time. Copies are available from the Information Division, Consumer and Marketing Service. The following are scheduled for issuance during 1969:

1969 Acreage-Marketing Guides

Summer and Fall Vegetables, Melons, Sweetpotatoes - March

Vegetables for Commercial Processing - March

Summer and Fall Potatoes - March

1970 Acreage-Marketing Guides

Winter Vegetables and Potatoes - August

Spring Vegetables and Melons - November

Spring Potatoes - November

PLENTIFUL FOODS MONTHLY LISTS

Plentiful Foods Monthly List is an advance listing of foods which are expected to be in plentiful supply during the succeeding month. A "Distributors" edition of the list is prepared especially for wholesalers, jobbers, retailers and others engaged in selling food to consumers. A "Food Service" edition is prepared for such public and institutional feeders as restaurants, cafeterias, inplant feeders, etc. Decisions on listings of plentiful foods are made in Washington by USDA food analysts, and national lists (Distributors and Food Service) and published showing foods expected to be in plentiful supply throughout the greater part of the United States. Marketing specialists in District offices of the Consumer Food Programs then adapt these national listings to their own area, and the two regionalized lists are published each month from each of the five Area offices. The lists are released about the middle of the

¹ Market News Reports are listed in C&MS-21 "Federal-State Market News Reports—a Directory of Services Available," from Information Division, Consumer and Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250.

month, covering the succeeding month. For addition to the mailing list, write to the Food Trades Staff, C&MS USDA, stating your occupation and need for the information, and your preference as to which list will be most helpful to you - Distributors or Food Service.

Occasionally, Special Plentiful Foods Programs are conducted on foods in especially plentiful supply. Fact sheets of supply and background information are customarily prepared to support these campaigns—one for food distributors, one for the food service industry. Apply as above.

Smart Shopper Guides and Every Day Food Guides list economical foods in plentiful supply for the month as well as the USDA-donated foods available during the month. The Guides are distributed as reproducible proofs through C&MS' Food Trades Staff in cooperation with the food stamp and commodity distribution programs. They are reproduced locally and sent to recipients, to the food industry, and are used as training aids.

Smart Shopper Recipes—simplified, illustrated and using low-cost foods—have proved popular and useful in USDA's "Food Makes the Difference" campaign. These picture recipes are one of several means of communication being used by C&MS to help low-income families get a wholesome, nutritious diet at the lowest cost. They are geared to the food needs of families participating in USDA's food stamp and commodity distribution programs.

TOBACCO REPORTS

Tobacco Stocks Reports provide quarterly information on the supply and carryover of tobacco stocks held by warehouses, dealers, and the Federal government. These publications, in the "TOB" series, cover tobacco stocks on hand as of January 1, April 1, July 1, and October 1 of each year.

Annual Tobacco Market Reviews provide an annual summary of market prices, sales, and quality of major tobacco types. They are published for the following types:

Flue-cured tobacco, TOB-FL
Flue-cured and dark air-cured tobacco, TOB-FDA
Light air-cured tobacco
TOB-LA Part I (Burley)
TOB-LA Part II (Maryland)

To get on the mailing list for any of these publications, contact the Tobacco Division, C&MS, USDA, Washington, D.C. 20250.

REPORTS ON REGULATORY ACTIVITIES

Federal Milk Order Market Statistics provides monthly information on the operation of Federal milk marketing orders which, on March 1, 1968, regulated the handling of milk in 74 designated urban marketing areas throughout the country. Approximately 50 percent of all milk marketed by farmers in the United States, and two-thirds of all milk sold for fluid use, is priced under the Federal milk marketing orders. This publication reports minimum milk prices, number of producers delivering milk to regulated handlers, total deliveries and use made of the milk, and fluid milk product data. It also highlights major milk order actions taken during the month. To get your name on the mailing list, write to the Dairy Division, C&MS, USDA, stating your occupation and need for the information.

Prosecution and Seizures under the Federal Seed Act. Reports or notices on individual court actions under the Federal Seed Act are issued as cases are completed. A publication is issued annually summarizing the facts involved in all court actions taken during the preceding fiscal year. For copies write to the Grain Division, Consumer and Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250.
